

COLLECTION

INFINITE

MADE IN ITALY

Infinite Italy provides
to your timepieces
the perfect movement
for their recharge,
but also a wonderful way
to show them,
to keep them or simply
admire them.

INFINITE
MADE IN ITALY

Combining fine materials and luxury finishes, Infinite Italy realizes a product with a high content of design and innovation, with the collaboration of qualified Italian technicians.

The electronic heart of this "magic box" allows the timed bidirectional rotation of the automatic clocks, thus allowing them to be recharged. Perfect rotors, chromed or gold plated, turn in a shell of rare beauty. The base can be in steel, leather, carbon or other daring materials.

Electronic gadgets allow the opening and closing of the safety dome, with a remote control.

Both collectors and simple amateurs of watches will not miss the opportunity to see their jewel staying in a splendid display case, the perfect example of Italian ingenuity and craftsmanship.

*Protect
your time...
entrust it
to
Infinite Italy*

I created INFINITE ITALY to satisfy the watchmaking enthusiasts and lovers to guard and keep their jewels in perfect charge, AVOIDING DAMAGES if not used.

I also wanted to give our watches a display case of absolute innovative content and unique design.

At long last, today you have the watch of your dreams in a display case that enhances its beauty, customizable with your name.

Nicola Orso

CATENA

Mod. 20
CATENA chromo

INFINITE
MADE IN ITALY

Made with innovative materials, the **CATENA** model stands out for its authentic design and gyroscopic movement. A chain moves the stainless-steel wheels, giving your watch the perfect movement for its winding. And what about the LEDs that light up the outline of the 3 plexiglasses, even in the RGB version. Originality and Italian craftsmanship give birth to a unique and unmistakable case.

CUSTOM

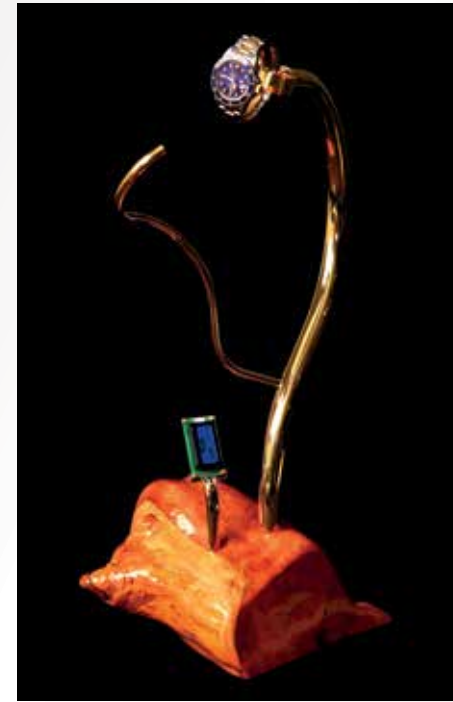

Always looking for ways to surprise, all of us at INFINITE ITALY study new shapes and look for new daring materials for the creation of unique and innovative objects.

This is how each of our models is born, from a dream that becomes reality.

The CUSTOM section is specialized in building unpublished watch winders, made especially for the customer. We satisfy your requests, making an idea a reality.

*We are here
for you.*

A Juniper-scented watch winder. This is what a customer who loves Sardinia wanted. (Italy)

The Carrara marble, a source of inspiration for exceptional sculptors, contains the technology to wind the watches. 24K rose gold plated gears, give richness and harmonious lines. The marble, made thin by the processing, makes the internal lighting of the LEDs pass through its veins. (Tuscany).

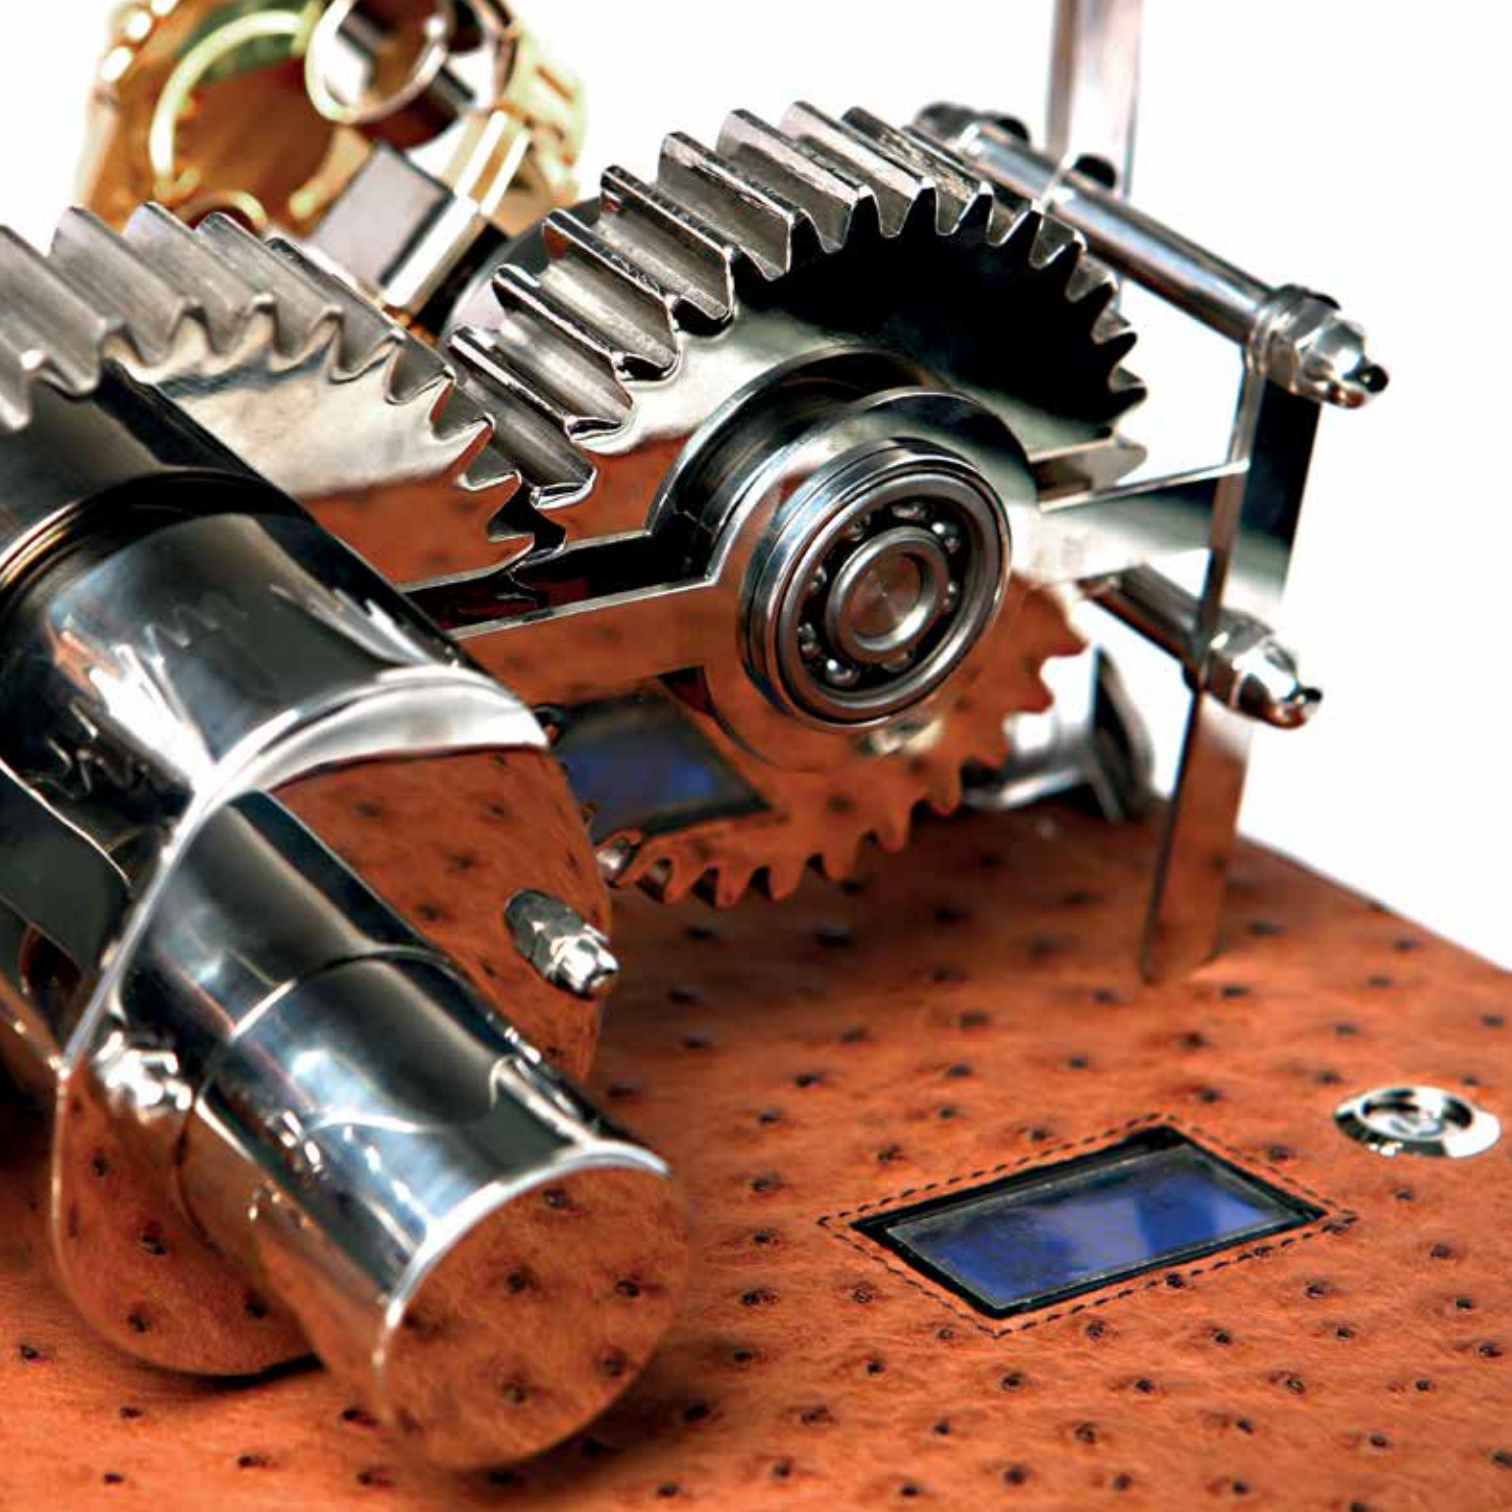

Example of simplicity, strong lines and led lighting of the 3 plexiglasses parallel, for an important desk. (Rome).

A simple watch winder, but at the same time perfectly integrates into a furniture made from the same wood. Integration and design. (New Jersey).

Celebrate the 24 HOURS of Le Mans with a colourful watch winder strong and fast, like the cars it celebrates. (Le Mans).
